

AMIN ZOROEFI

XR Developer

EDUCATION

Master's Degree - Digital Electronic Systems

University of Guilan, Rasht
September 2016 – January 2019

Bachelor's Degree - Electrical and Electronics

University of Guilan, Rasht
September 2011 – August 2016

SKILLS

- 4+ years of working experience in **Unity3D**
- Experience building and deploying to **iOS, Android** platforms
- Basic knowledge of 3D software e.g. **Blender, Rhino**
- **Programming Languages:** C# (Visual Studio), Python (TensorFlow, PyTorch, Keras), C++, JavaScript, and .NET
- **Object-Oriented Programming (OOP)**
- Source and Version Control: **Git**
- Ability to work in a collaborative environment
- Ability to organize and complete multiple tasks/projects at one time
- Good knowledge of written and spoken English
- Good communication and relational skills

SUMMARY

Experienced **Unity3D** and **C#** developer proficient in agile methodologies, **AI, UI/UX**, Optimization, **Render Pipelines**, and **VR/AR**. Delivered **over 20** successful **games** and **software** solutions for various industries. Strong communication and collaboration skills to meet project goals. This experience led to the skillful use of state-of-the-art resources and technology to assist in work activities. Passionate about leveraging technology to drive innovation and success in future projects.

WORK HISTORY

AI Researcher

London South Bank University, London (Remote)

March 2020 – Present

Augmented Reality and Virtual Reality Software:

- **AR Workspace Designer:** Easily design and customize your workspace using **Plane Detection**. This feature helps detect flat surfaces like floors or tables, ensuring your virtual workspace is accurately placed in the real world
- **Real-Time Parametric Modeling** in AR using **C#**
- **ExplodeAR:** Separation of 3D objects from the center in an immersive AR environment
- **FEMExplorer:** Exploring **Abaqus FEM** Analysis through AR/VR

Machine Learning:

- Applied various machine learning techniques, such as Gaussian Process Regression (**GPR**), Support Vector Regression (**SVR**), and Artificial Neural Networks (**ANN**), to solve complex problems and make accurate **predictions** based on large datasets

Generative Design:

- Combining **Machine Learning** and **Optimization** methods enables optimal **generative design** by analyzing data to extract patterns and relationships, and using this information to refine and improve designs to meet specific objectives

Executive Assistant

University of Guilan, Rasht

October 2020 – March 2022

- **AR Business Card:** Unity 3D and **Vuforia** AR platform were used to develop an engaging and interactive digital Business Card
- **First Person Shooter:** Engage in heart-pumping combat and take down enemy forces in a thrilling first-person shooter experience
